WORK EXPERIENCE

Product Manager · Premium Minds · Liqui.do · SIBS

The past 4 years working as product manager I had the pleasure to work amongst bright engineers and designers committed to build digital products viable to business and valuable to users. I have been first inspired into Product Management at Productized Conference while learning with Marty Cagan, Dan Olsen and other product leaders.

Latest achievements:

- Digital transformation of a Startup upgrading its shipping time changing company processes. Previously it took 3 months to deploy new ideas in production. Within 6 months, we were able to change it to daily deploys and time to market of new projects for 2 weeks applying, Continuous Integration/Continuous Delivery, Design Thinking and MVPs principles.
- Uniting heterogeneous teams on the verge of collapse focusing on the Product Vision and providing a common shared purpose.

Main tasks:

- Product development, product road mapping
- Team coordination as project delivery manager
- Customer interviews and user testing
- Product Design Sprints applying Design Thinking Methodologies
- Agile methodologies implementation, namely Scrum and Kanban
- Data analysis on market, competitors, product usage metrics
- Team nurturing (hiring interviews, 1-on-1 meetings, goal setting, feedback)

EDUCATION

MSc. in Electrical and Computer Engineering

Instituto Superior Técnico – Lisbon (2007 → 2014)

UX/UI Design course (216 hours)

EDIT – disruptive digital education (Sep 2019 → Feb 2020)
